

MUSTIMUHW

Choose Mustimuhw for Jordan's Principle

At Mustimuhw, we understand the importance of providing Indigenous organizations with the appropriate tools to support their work. We're not just a vendor. We come from community. We see beyond the raw data to the real people and families they are connected to.

A Foundational Tool for Jordan's Principle

Mustimuhw offers an active, dynamic information ecosystem with powerful functionality for all health & wellness teams; removing the need for separate software systems for each community program or department and improving communication, information sharing and collaboration across teams.

Designed to support the Jordan's Principle workflow, Mustimuhw captures quality case management, service delivery and advocacy for children and families. Mustimuhw is rich in features like case documentation, program and funder reporting, referral and task management, fillable forms & templates, and tracking of group programs and services.

Privacy & Security, Data Governance, OCAP

We take the privacy & security of your data very seriously. It's your Nation, and your data. Mustimuhw leaves it in your hands. Our role-based security lets you control who can view and access your data.

- OCAP-aligned; supporting Nation-based data ownership
- Task management and Follow-up reminders for individuals and teams
- Referral and wait-list tracking
- Fillable Jordan's Principle forms
- Efficient & robust reporting
- Role-based security ensures appropriate access to information
- Usable by other programs and teams in your organization (Health Centre & CFS teams)
